INTRODUCTION

a. 2017 Premium Rates Summary

The Workplace Safety and Insurance Board's (WSIB) Board of Directors approved the first overall rate reduction in 15 years for the 2017 Premium Rates.

The Board approved a 6.2 per cent reduction on the average premium rate for Schedule 1 in 2017. It approved modest rate increases for two rate groups: Rate Group 845 - Local Government Services and Rate Group 590 - Ambulance Services, which are affected by the presumptive Post Traumatic Stress Disorder legislation. All other rate groups either experienced a decrease or were not adjusted.

This rate reduction means that the WSIB will collect an estimated \$310 million less compared to 2016 from employers. This has positive implications for Ontario's economy in terms of potential job creation and investment.

Going forward, the WSIB will continue to work with the Chair's Advisory Committees, which represent employers and injured workers from various sectors. These committees provide valuable advice and guidance to the WSIB Chair, President and CEO, and Executive Committee and their input is taken into account as part of the annual decision-making process for setting premium rates.

b. Derivation of Premium Rates

The Schedule 1 costs of the workers' compensation system are funded through premium rates, which are applied to the payroll of Schedule 1 employers. All Schedule 1 employers are not charged the same rate. Rather, for the purpose of charging them on an equitable basis, employers are classified into rate groups. Rate groups are defined in a classification scheme and each rate group has a different premium rate, intended to reflect the inherent risk of the specific business activities of industries insured within that group.

The classification scheme divides business activities into nine broad classes, which are further subdivided into 155 rate groups based on similarity of business activity and relative risk. The number of rate groups remains unchanged from 2016. Additional details about the classification scheme itself can be obtained from the WSIB's *Employer Classification Manual* on the WSIB website at www.wsib.on.ca.

Premium rates are expressed as a dollar amount per \$100 of insurable earnings. For each of the classes and rate groups defined in the classification scheme, their premium rate includes an amount for:

a) New claims cost - the expected future lifetime costs to pay benefits for all new claims for the premium year;

- b) The WSIB's expenses to administer the WSIA, the Ministry of Labour's expenses to administer the Occupational Health and Safety Act, the Workplace Safety and Insurance Appeals Tribunal, Offices of the Employer Advisor and the Worker Advisor, and the expenses of the Health and Safety Associations and research; and
- c) Past claims cost includes a charge to retire the WSIB's unfunded liability.

The amounts attributable to each of these three components use claims experience and insurable earnings data from the most recent six years . For 2017, that is the period from 2010 through 2015 inclusive. Details supporting premium rates are shown in the various exhibits of this *Premium Rates Manual*.

An annual maximum ceiling for average earnings used for determining benefits and premiums is set each year according to the *Workplace Safety and Insurance Act*. The ceiling for the premium rate year (2017) is based on 175% of the average industrial wage for Ontario from the most recent published Statistics Canada earnings data available on July 1st of the previous year (2016). The 2017 maximum insurable earnings ceiling is \$88,500, an increase of 0.6% over the 2016 ceiling of \$88,000.

C. Classification Scheme and Data Sources

Schedule 1 employers are divided into nine classes (denoted by class codes A through I). Employers within each class are then subdivided into rate groups. The grouping of employers within a single rate group is based on similarity of business activities and/or relative risk. The number of rate groups in each class varies according to the size of the economic sector covered by each class. For example, Class B: Mining and Related Industries, contains four rate groups, whereas Class D: Manufacturing, contains 73 rate groups.

Rate groups are further divided into classification units. Classification units are used as a means of tracking the relative experience of various employer subgroups. Firms in a classification unit share similar business activities, risks or other characteristics. All employers within a single rate group, no matter which classification unit they belong to or their payroll size, are charged the same premium rate (before any merit adjustments or experience rating). Premium rates are not calculated for classification units.

The classes referred to in this manual should not be confused with industry sectors, which is another categorization used by the WSIB to compare common business practices and approaches.

The figures shown in the various exhibits of this manual are based on the data available as of January 2016. Employers may obtain more recent information by contacting the WSIB (see Section 11 of this manual for contact information).

d. The Role of the Workplace Safety and Insurance Board (WSIB)

The WSIB is a statutory corporation created by an Act of the Ontario Legislature in 1914. The WSIB is responsible for administering the *Workplace Safety and Insurance Act, 1997* (*WSIA*). The Ministry of Labour is responsible for administering the *Occupational Health and Safety Act*.

The WSIB receives no government funding and is funded solely through employer premiums. Revenue is also raised through returns on invested assets.

The WSIB helps workers deal with the consequences of workplace injuries and illnesses – providing a comprehensive bundle of insurance benefits and helping workers recover and return to work. The WSIB:

- Provides benefits to injured and ill workers and to the dependents of workers who have died as a result of a workplace injury or illness; and
- Assists in the return to work and recovery of injured and ill workers.

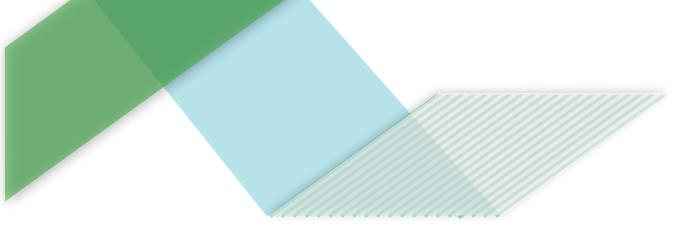

Employers covered by the *WSIA*, are divided into two groups, referred to as "Schedule 1" and "Schedule 2." Schedule 1 employers are insured under a "collective liability" system, and are required to contribute to the WSIB Insurance Fund. Schedule 2 employers are "self-insured," and are individually liable for the full costs of their workers' WSIB claims. The WSIB pays insurance benefits for Schedule 2 workers and is reimbursed by Schedule 2 employers for costs (including administrative costs) of the claims.

This Premium Rates Manual pertains to Schedule 1 employers only.

SECTION 2

Definition of 2017 Premium Rate Components

DEFINITION OF 2017 PREMIUM RATE COMPONENTS

A. New Claims Cost

| 1. | New Claims Cost | The estimated full cost of new claims for injuries |
|----|-----------------|--|
| | | expected to occur during 2017 |

B. Overhead Expenses

| 2. | Administrative Expenses | Expenses of the WSIB estimated for the year 2017, to administer the <i>WSIA</i> |
|----|-------------------------|---|
| 3. | Legislative Obligations | Expenses the WSIB is required to fund under the <i>Occupational Health and Safety Act,</i> the Workplace Safety and Insurance Appeals Tribunal, Office of the Employer Advisor, Office of the Worker Advisor, Health and Safety Associations and research |
| 4. | Total Overhead Expenses | Total of Administrative and Legislative Obligations expenses |

C. Past Claims Cost

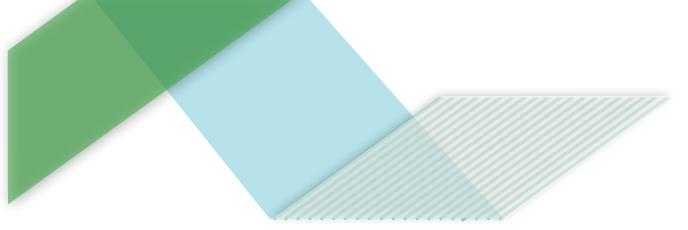

| 1. | Past Claims Cost | Includes payment required to retire the |
|----|------------------|---|
| | | unfunded liability |

D. Premium Rate

Total cost per \$100 of insurable earnings required to fund new claims, overhead, and past claims

SUMMARY OF ALLOCATION RULES FOR 2017 PREMIUM RATES

A. New Claims Cost

New Claims Costs are determined at the class level. However, rate groups belonging to a class pay them.

The share of the class new claims cost charged to a member rate group is based on the expected number of claims and the average cost of a claim expected for that rate group for the premium year.

The average cost of a claim for a rate group is determined via a Cost Index, which indicates the relative costliness of an average claim for the rate group as compared to the average cost for its class.

B. Overhead Expenses

Schedule 1 overhead expenses are allocated to rate groups in proportion to their new claims cost and insurable earnings.

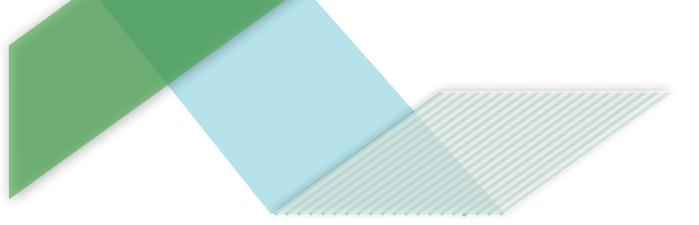

C. Past Claims Cost

Past Claims Cost paid by a rate group is the remainder of its 2017 premium rate after New Claims Cost and Overhead expenses have been deducted.

SECTION 4

2017 Premium Rates for Each Rate Group, by Class

| | | 2017 |

2017 CLASSIFICATION SCHEME CHANGES

There are no changes to the classification scheme for 2017.

Consequently, the number of rate groups in the WSIB's classification scheme remains at 155, the same as for 2016.

wsib 2017 Premium Rates Manual

NON-CREDIBLE RATE GROUPS

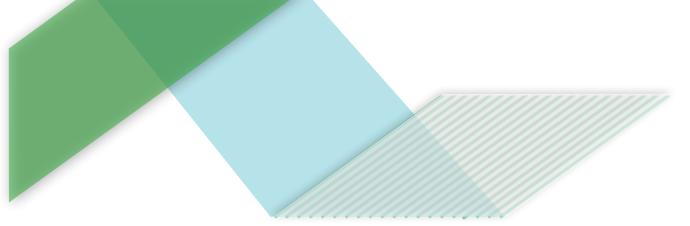

Ideally, each rate group defined in the Workplace Safety and Insurance Board's classification scheme should be credible, that is, large enough so that reasonably reliable estimates can be made for deriving premium rates from a rate group's own claims experience. Although this is generally the case, particular industries or services in Ontario can decline substantially as the economy undergoes changes and this can lead to a situation where a previously credible rate group becomes non-credible. In addition, some rate groups have reduced the number of injuries to a level where there is not enough information available to estimate the average cost of a claim and, as a result, the rate group becomes non-credible. As part of the ongoing activity of rate making, the Workplace Safety and Insurance Board (WSIB) monitors the credibility of rate groups.

Since the original development of the WSIB's current classification scheme, which was introduced in 1993, a number of rate groups have become non-credible. Different approaches have been used to address the issue of non-credibility (e.g. through some form of rate group merger) depending on the circumstances of each rate group.

Data supporting the 2017 premium rates shows that under current criteria seventeen rate groups are not fully credible. It is possible that the experience of some of these rate groups may return to a fully credible level but the rest are likely to remain non-credible. With regards to addressing this issue, however, any modifications to the industry classification scheme will be deferred to be incorporated into the upcoming implementation of a new rate framework.
