

Building a safer Ontario – the Health and Safety Excellence program

The Workplace Safety and Insurance Board's (WSIB) Health and Safety Excellence program provides businesses in Ontario with a clear roadmap to improve their safety, whether they are just getting started or need to improve the systems they have in place.

How to get started?

Businesses can start by attending one of [our information sessions](#) to learn more about the program and the benefits of joining. Following the information session, you can register with a [WSIB approved provider](#) that best meets your needs.

Your business will complete a short online health and safety assessment that evaluates your current measures and suggests program topics that addresses the unique needs of your business. You can complete these topics over a 12-month period at a pace that works best for you.

The WSIB will then review and validate your progress and you will then be eligible for financial rebates and other recognition.

The Health and Safety Excellence program will take your business from awareness to excellence, improve the safety of your workplace and save you money.
